Blockchain Revolution | Blockchain Research Institute

A blockchain, originally block chain, is a growing list of records, called blocks, that are linked using cryptography. Each block contains a cryptographic hash of the previous block, a timestamp, and transaction data (generally represented as a Merkle tree). By design, a blockchain is resistant to modification of the data. It is "an open, distributed ledger that can record transactions between two parties efficiently and in a verifiable and permanent way". For use as a distributed ledger, a bloc

Blockchain - Wikipedia

The blockchain revolution A "blockchain" refers to a "chain" of cryptographic digital records, where each "block" carries transaction data. The use of complex codes on each data block creates, when chained together, a record of ownership and transactions that is supposed to be extremely difficult if not impossible to manipulate.
