Bose 802 series III loudspeakers are used in combination with the Panaray system controller or the Bose 1600 or 1800 amplifi ers with the 802 plug-in EQ card for active equalisation of the system. The Panaray controller assures smooth, accurate spectral response across the entire operating range of the 802 series III loudspeaker.

I'm wondering if someone out there would be able to run me through the Parametric EQ Settings on a Yamaha RX-V3079 for a pair of Bose 802 Series III speakers. I realise that the Yamaha is under powering the speakers, however I plan on integrating a PowerMatch amp in the not to distant future, which I understand has an active EQ built in.

3. Because of the special characteristics of the eq box you can no longer use any other speakers on that receiver. Using the Bose 802's will preclude the ability to switch back and forth between different sets of speakers unless you take the eq out of the system and then plug the little jumpers back in. That's it. Enjoy your Bose, I enjoyed ...

You could look up the service manual (or some of the curves I've published previously) for a Bose 901 Series III equalizer, but you'd need to shift the curves somewhat to make it work. I've never seen an equalizer which offered more than +12 dB of gain – which represents only a 15.8x increase in level at that frequency.
