Microsoft Access 2010 Vba Macro Programming: Richard ...

What is a macro? A macro in Access is a tool that allows you to automate tasks and add functionality to your forms, reports, and controls. For example, if you add a command button to a form, you associate the button's OnClick event to a macro, and the macro contains the commands that you want the button to perform each time it is clicked. In Access, it is helpful to think of macros as a simplified programming language that you write by building a list of actions to perform.
