Locative media are digital media that are linked to particular geographical locations, through the use of GPS for example. Locative media can encourage new ways of engaging with the layered histories, meanings and sensory experiences of landscape.

Locative Media - Waag Society

The goal of this document is to provide some basis for discussion on Locative Media within (and possibly outside) Waag Society. First of all let's look at some definitions. Wikipedia states the following: "Locative Media are media of communication bound to a location.

About Locative Media | The Mobile City

In the edition of the Leonardo Electronic Almanac on locative media, Julian Bleecker defines locative media as follows: "Locative media that is of most immediate concerns is that made by those who create experiences that take into account the geographic locale of interest, typically by elevating that geographic locale beyond its instrumentalized status as a 'latitude longitude coordinated point on earth' to the level of existential, inhabited, experienced and lived place.

Locative media - Wikipedia

Locative media or location-based media (LBM) are media of communication functionally bound to a location. The physical implementation of locative media, however, is not bound to the same location to which the content refers. Location-based media delivers multimedia and other content directly to the user of a mobile device dependent upon their location.
